

Masking Products

In addition to the masking capabilities of our vinyl caps and plugs, we offer a variety of specialized masking products.

FINISHING DISCS

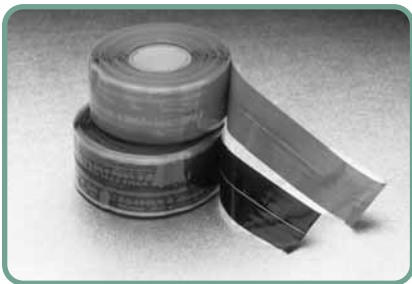

Painting discs are heat-resistant, adhesive-backed crepe paper that withstand bake temperatures of 300°F for one hour. They leave a clean line, with no “creeping” under edges and no residue or stain from the adhesive.

Plating discs last for up to one hour at 200°F, resist more chemicals than similar vinyl discs and resist curling and shrinking.

Powder coating discs are made of extra thick polyester, making them effective for up to one hour at 425°F.

SILICONE TAPE

Use this self-sticking tape to conveniently mask irregular shapes. No mess, no heat, no tools required and uses no adhesive.

Polyethylene Sleeving

Prevents damage to surfaces. Identifies various grades. Can cover

irregular contours, from flat to round, and will stay in place until pushed off.

Part No.	Fits Diameter	Colour	Mini Coil (ft.)	Maxi Coil (ft.)
NG .25	1/4 to 1/2	Yellow	650	3000
NG .50	1/2 to 1	Blue	550	2750
NG 1.00	1 to 1-1/2	Red	340	1700
NG 1.50	1-1/2 to 2	Black	180	900
NG 2.00	2 to 2-1/2	White	160	800
NG 2.50	2-1/2 to 3	Yellow	120	600
NG 3.00	3 to 4	Green	90	450
NG 4.00	4 to 5	Orange	70	350
NG 5.00	5 to 6	Brown	60	300
NG 6.00	6 to 7	Blue	50	250
NG 7.00	7 to 9	Natural	40	200

Minimum order one roll. Sold in full rolls only.
