

Hosers (Acetal Tube And Hose Clamps)

A non-metallic clamp that will not rust, is non-conducting, not corroded by sea water and is stable in a wide variety of chemical salts, bases, alcohols, oil, grease, gasoline, etc. Often used in place of stainless clamps.

Can be applied by quick ratchet closure, even after hose is in place. A lateral effort disengages the clamp. A stand and a pneumatic closing tool are also available.

Stocked in acetal. Black heat- and UV-stabilized, glass-filled nylon (for outdoor or under the hood applications) also available at an additional charge.

NYLON HOSE MATES™

Cords has a full line of nylon hose clamps. They are quick, easy to install and tighten instantly with hand pliers. These lightweight clamps resist salt water corrosion, weak acids, grease and common solvents. Hose Mates™ can be removed without cutting, so they are reusable – both recyclable and cost-effective!

Hose Mates™ are available in seventeen popular sizes, from a minimum diameter of 1/4" up to a maximum diameter of 2-3/8". Cords stocks them in black and white nylon, and they are also available in black glass-filled nylon.
